# THE COLOMBUS DOORS

The Columbus Doors, designed by American sculptor Randolph Rogers, were made as bronze twins and stand imposingly at the east entrance to the U.S. Capitol Building since 1863. Each scene depicting the life of Christopher Columbus is finely modeled. At the pinnacle is a bust of Columbus, surrounded by rays and oak leaves, signifying his rising to glory. A running border is ornamented with Indian headdresses and emblems of conquest, navigation, the arts and sciences, history, agriculture, and commerce. The four figures symbolizing the continents of Asia, Africa, Europe, and America indicate the entire world's acknowledgement of Columbus's accomplishment. Between the panels are sculpted heads of historians and others whose writings on Columbus's voyage were the bases for the scenes depicted.

In a universe filled with wonders beyond imagination, there are those who dare to venture beyond the boundaries of familiarity.

This is what defines us. This is what defines ABSDOOR. From East to West, and from South to North, we do love to explore new regions. We love meeting with new partners, sharing our products, and discovering what it is authentic and original all around the globe.

Thank you for all our dearest partners that makes us a global company in the last 20 years. But there are always more to discover. Come join us and be a part of the ABSDOOR Global!
